 SCHOLASTIC

It started like any ordinary day in Ms. Frizzle's class. But that doesn't mean much — there *aren't* any ordinary days in Ms. Frizzle's class.

That morning we were trying to put together an enormous globe. But we didn't have all the pieces, so the whole thing fell apart.

"Carlos," said Dorothy Ann, her nose in the instruction book, "if you spent more time on research, you would know how to put this globe together!"

Carlos dusted himself off. "And if you didn't spend so much time doing research, you could have helped!" he answered.

Ms. Frizzle looked over the mess. "I'm afraid you can't put that globe together until you have all the pieces," she told us. "You see, there's an island so new, it hasn't been discovered yet!"

"How can there be a *new* island?" asked Phoebe. "The earth never changes. Does it?"

"The earth is changing all the time," said Ms. Frizzle. "Right under your very feet."

We all looked down at our feet, but nothing was moving.

Ms. Frizzle's class is putting together a giant globe of the world. A piece is missing . . . an island so new it hasn't been discovered yet! And the Friz knows where to find it. The Magic School Bus takes the kids beneath the ocean's surface to explore an underwater volcano.

Join the class as they learn about volcanoes. It's an explosive field trip you won't want to miss!
