## LOOK ONCE

This bright white streak is on the back of a little creature with a loud voice.

## LOOK AGAIN

In summer and fall, chipmunks are busy gathering food. They carry nuts, seeds, and fruit in their cheek pouches. Then they bury the food in underground dens.

A chipmunk's den has many little rooms. Some are for sleeping and some are for storing food. When winter comes, the chipmunk will eat its hidden food.

## LOOK ONCE

If you get too close  
to this scaly leg,  
it will disappear  
inside a shell!
