

A Pet's Life

# Cats

# What Do Cats Look Like?

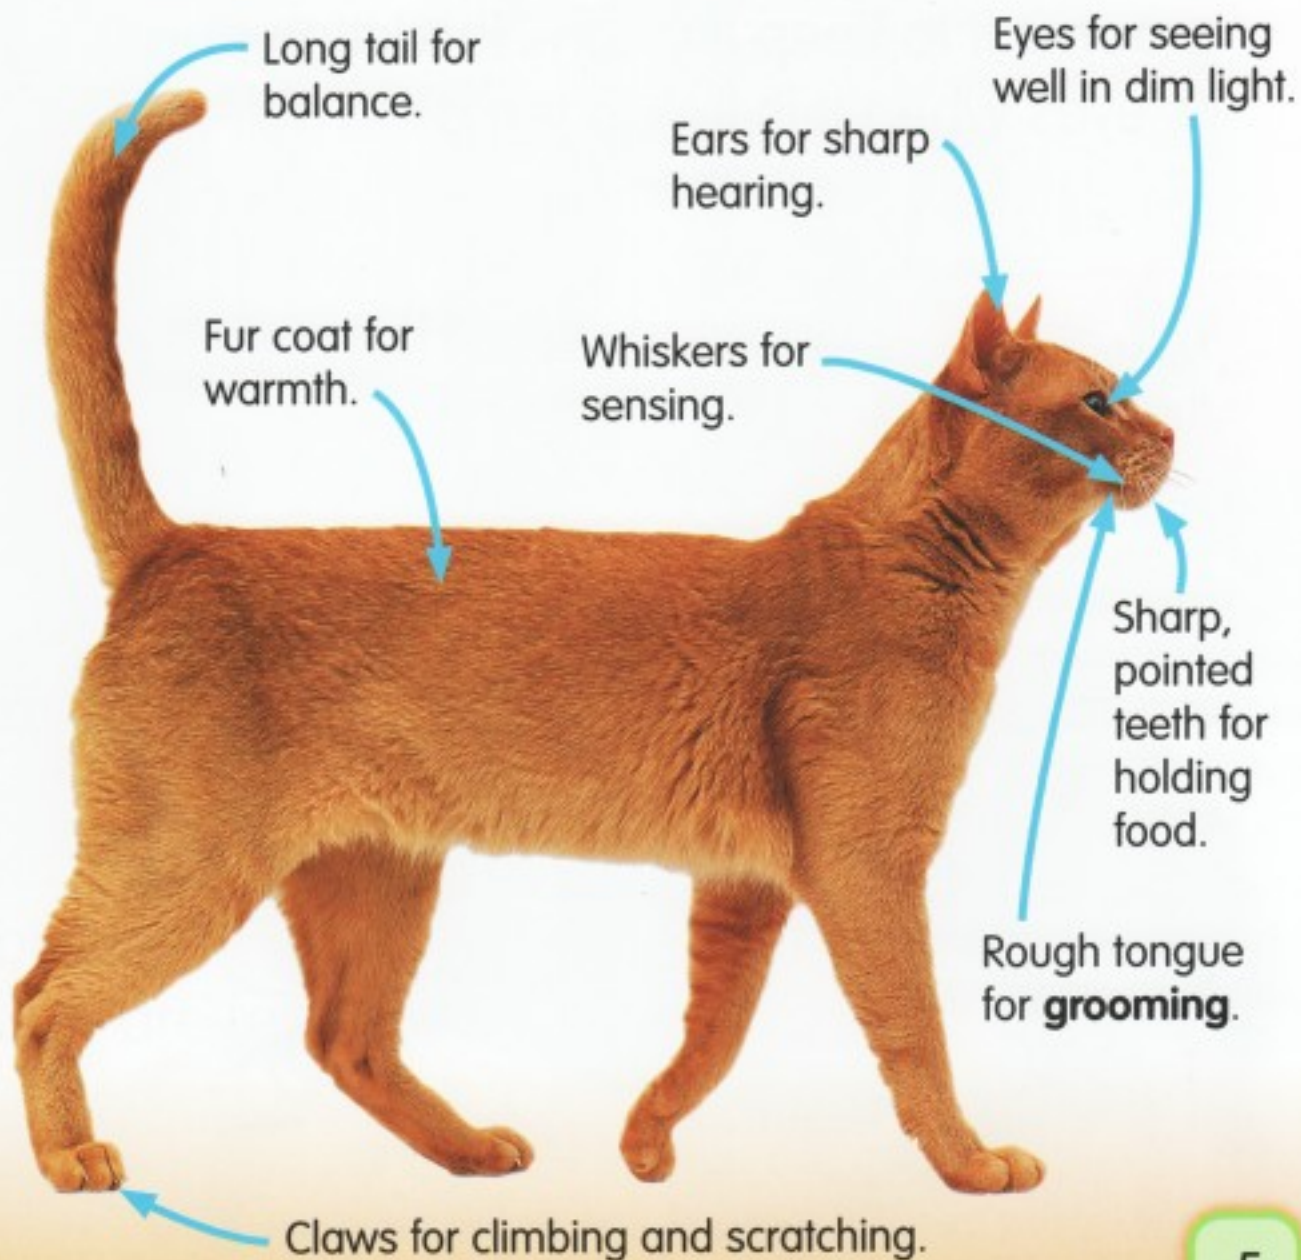

There are many kinds of pet cats. Cats can be big or small. They can have long, fluffy fur, or short fur. Cats are very popular pets.

This cat has long, fluffy fur.

This picture shows the different parts of a cat's body. You can see what each part is used for.

# Cat Babies

Baby cats are called kittens. A newborn kitten is small and helpless. Its mother **grooms** it to keep it clean. The kitten opens its eyes when it is five to ten days old.

Newborn kittens feed on their mother's milk.

# A Pet's Life

# Cats

- Why do cats need a scratching post?
- How old is a kitten when it first opens its eyes?
- How long can a cat live for?

*A Pet's Life* explores the life cycles of animals that are commonly kept as pets. Each book takes a chronological look at the animal's growth and development, and discusses essential needs such as housing, feeding, exercise, handling, and companionship. Packed with expert advice and useful tips, this series offers children all the information they need to help them become responsible pet owners.

**Each book includes:**

- a "map" of each animal to show how its body parts are used
- essential tips for pet care
- fact file
- captions, glossary, and index.

**Titles in the series include:**

|          |             |
|----------|-------------|
| Cats     | Guinea Pigs |
| Dogs     | Hamsters    |
| Goldfish | Rabbits     |
